EXPERIENCE

Macy's (via Epam Systems)

July 2023 – Present

Senior Backend Engineer

Bangalore, India

- Architected Java serverless ingestion pipelines using **GCP Cloud Functions and Pub/Sub**, reducing write latency by 70% (1s to 200ms) for 10+ TB daily data processing.
- Optimized **BigQuery** indexing and partitioning strategy, **reducing monthly query costs by \$12k+** while maintaining peak performance for StoreOps analytics.
- Implemented distributed **Redis** caching, improving API latency by 16% and sustaining 140k+ RPS during high-traffic events like Black Friday.
- Designed device-agnostic workflow libraries and mentored junior developers on GCP system design and multi-database optimization (Spanner, Oracle, PostgreSQL).

Goldman Sachs (via Epam Systems)

Sept. 2022 – June 2023

Blockchain Developer

Bangalore, India

- Architected **Java 11/Spring Boot** middleware with **DAML** bindings for US municipal bond issuance on the Canton protocol.
- Engineered custom locking mechanisms handling **1000+ RPS** to ensure transaction atomicity and prevent race conditions on the ledger.
- Optimized Active Contract Set (ACS) queries via local secondary stores, **reducing latency by 37%** for real-time settlement processing.
- Implemented JWT-based authentication and gRPC error handling for 10k internal users on the digital asset platform.

Walgreens (via Epam Systems)

Nov. 2021 – Aug. 2022

Backend Engineer

Bangalore, India

- Implemented **Redis** write-through caching on Azure, reducing CosmosDB contention by 40% for 100k+ concurrent pharmacy system users.
- Led a BFF layer orchestration of 6+ microservices, achieving a **65% latency reduction** (2.8s to <900ms) for customer terminals.
- Optimized fraud detection pipelines in **Stream Analytics**, increasing intercepted fraudulent claims by 25% via real-time velocity checks.

EDUCATION

NIT Puducherry

2014 – 2018

B.Tech in Computer Science

Puducherry, India

CERTIFICATIONS

Google Cloud Generative AI Engineer

Microsoft Certified: Azure Fundamentals (AZ-900)

DAML Associate (Digital Asset)

SKILLS

Languages : Java, Python, SQL, React, DAML

Cloud/DevOps : GCP (GKE, Pub/Sub, Spanner, BigQuery), Azure, Docker, Kubernetes, Terraform, ArgoCD

Frameworks : Spring Boot, Spring Cloud, Hibernate, gRPC, JUnit, Mockito
